Maths Vision

We believe that all children can succeed as mathematicians by embracing the journey and challenges that mathematics provides.

We want children to recognise maths as a skill that transfers to their life now and workplace of the future.

To enable this, children will:

- Actively seek and relish challenge
- Recognise and appreciate the power and beauty of maths which will enable their creativity to flourish
- Develop maths fluency and apply these skills to all areas of maths and the wider curriculum
- Be original, curious and flexible in their approach
- Gain a love for maths
